

# Astro Escape

## Background

In the near future, humanity's space technology will have advanced to the point where exploring other planets is possible. You, an experienced astronaut, have been selected for a mysterious and perilous mission—to venture deep into the galaxy, uncover the secrets of each planet, and search for legendary alien civilizations.

It is said that other civilizations exist in the universe, and scientists have detected some traces of them through telescopic observations. According to interstellar archaeologists, these alien civilizations have left behind mysterious artifacts of extraordinary power. These artifacts are scattered across multiple unknown planets, each with vastly different environments and ecosystems. You must overcome countless challenges to navigate the labyrinths of these planets as quickly as possible and locate these treasures. Some say these civilizations hold the key to altering humanity's understanding of universal laws, while others believe they are mere legends. However, as an explorer, your mission is to uncover the truth about these alien civilizations.

## Mission Objectives

You will pilot your spacecraft through endless interstellar dust, solving intricate mazes to reach various strange planets. Your goal is to find traces of aliens on these planets and uncover the mysteries surrounding them.

However, the journey will not be smooth. Each planet is fraught with unknown dangers, ancient mechanisms, and puzzles that require your intelligence to solve. Your decisions and actions will determine your fate—whether you become the legendary interstellar hero or lose yourself in the darkness of space.

## **Level Description (Planet Introduction)**

Mars: A planet filled with lava and volcanic eruptions, where the scorching environment makes exploration extremely challenging. The legendary treasure is said to be hidden deep within the volcanoes.

Ice Star: A planet covered in extreme cold, where the treasure is sealed within thick layers of ice, requiring special methods to unlock.

Mist Planet: A mysterious planet shrouded in endless fog, teeming with unknown dangers. Only by solving the planet's riddles can you uncover the true treasure.

## **End of game**

When you successfully unravel the secrets of these planets, you will realize that these treasures are not mere legends but keys to a vaster universe. You will have become the greatest explorer in human history, yet your journey does not end here. Your spacecraft is ready to venture into even deeper and uncharted galaxies.

As the engines roar, you gaze at the unexplored regions on the star map, filled

with anticipation. A new adventure is about to begin, and your legend  
continues.....
